

Skills: Python, Django, React, JavaScript, Html, CSS

As an early hire on the Curiosity Gym team, you will influence and drive technical decisions that will shape our company.

You'll work closely with the founding team & Software Architect to develop and support Curiosity Gym's learning platform.

What You'll Do

- Build both frontend and backend components of our web application.

- Aid in frontend design of the web application

What we are looking for:

- Frontend experience with React/JavaScript/HTML/CSS.

- Experience working with Python and Django is a must.

- Experience with Restful APIs.

- Ability to write testable, and efficient code. TDD is a plus.

- Good knowledge of relational databases such as Postgres.

- Basic understanding of performance optimization and scalability for web applications.

- 3+ years' experience in a development role.

- Experience working in cloud native environments (AWS) and Docker is plus.

Bonus:

- Strong UI/UX design skills (huge plus)

- Online portfolio to showcase your work

- A 4 year degree in Computer Science.

We're looking for teammates who are:

- Curious, Self-starters, Hard workers and Problem solvers.
