Friendly game played against primarily Danny and Jeff.

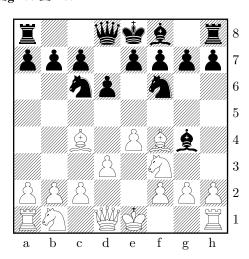

o Holy Family Team • Sylvan, Kayvan A **Holy Family Chess (1) Holy Family Educational Center** 2001.05.11 0-1

B00j

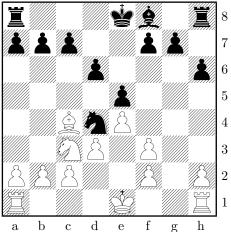

1. e4 🖾 c6 D

This is the Nimzowitsch defense. Named after the master of strategy, Aaron Nimzowitsch. I use it because it is flexible and surprises people. 2. \(\hat{2}\)c4 d6 3. \(\infta\)f6 4. d3 \(\hat{2}\)g4 5. \(\hat{2}\)f4?! D

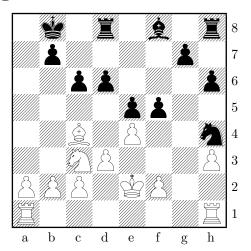

This move loses a tempo. 5... e5 6. \(\hat{2}\)g5 h6 7. \(\hat{2}\)xf6 ₩xf6 8. ②c3 ዿxf3 9. ₩xf3 ₩xf3 10. gxf3 ③d4

White looks like he is in a bit of trouble. Looks like the c and f-pawns can not both be defended. 11. O-O-O

(11. \subseteq b5!? This is much better, leading to... 11... 🖄 xf3+ 12. 🕸 d1 O-O-O 13. 🕸 e2 🖾 h4 14. 🛱 xa7+ 🕸 b8 15. 🛱 b5 c6 16. 🛱 c3 f5 \mp With a roughly equal position. 17. h3

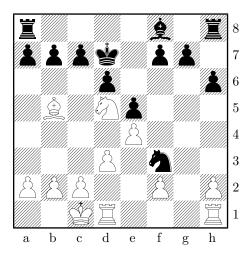

The final position for the possible outcome of 11. Nb5)

11... 🖾 xf3 12. 🖾 d5 🗳 d7

(12... O-O-O This is also good. Black has a clear advantage.)

13. **≜** b5+? D

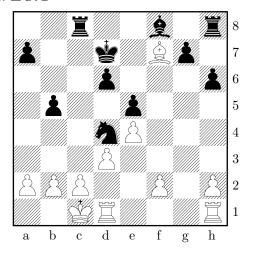

This loses a piece and the game.

(13. \times e3 This is much better. Or even:)

(13. h4 With the idea of booting the knight from f3. A plausible continuation would be:
13... c6 14. ≅h3 cxd5 15. ♠b5+ �e7 16. ≅xf3 ∓ White has some compensation for the pawn, though I would still say that Black has a small edge.)

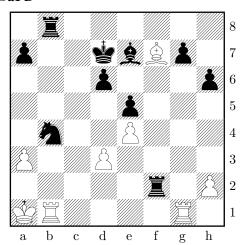

13... c6 14. \(\hat{2}\)a4 b5 15. \(\hat{2}\)b3 cxd5 16. \(\hat{2}\)xd5 \(\beta\)c8 Where else? This is the natural place for this rook. 17.

≜xf7 Ød4 D

(26... 🖄xa3+!! is even better 27. 🗳a1 (27. 🗳xa3 d5+ Leads to a quick mate) 27... 🛱xb1 28. 🖺xb1 🗒xb1+ 29. 🗳xb1 🗒xf7 +- Black has an overwhelming material advantage)

27. 🗳 a1 D

Leads to a surprise finish. All continuations were losing. 27... 27
