

List of Tables

| | |
|--|----|
| 1.1.1. Time periods of available data, and the total number of analytical results, for each stream. | 4 |
| 1.5.1. Descriptive statistics for Burns Creek water chemistry. SC is specific conductance; NA means data are missing for a sampling event. | 13 |
| 1.5.2. Descriptive statistics for Jerritt Canyon Creek water chemistry. SC is specific conductance; NA means data are missing for a sampling event. | 17 |
| 1.5.3. Descriptive statistics for Snow Canyon Creek water chemistry. SC is specific conductance; NA means data are missing for a sampling event. | 21 |
| 1.5.4. Descriptive statistics for the Gracie RDA drainage water chemistry. SC is specific conductance; NA means data are missing for a sampling event. | 25 |
| 1.6.1. Descriptive statistics for California Creek water chemistry. SC is specific conductance; NA means data are missing for a sampling event. | 27 |
| 1.6.2. Descriptive statistics for DASH drainage water chemistry. SC is specific conductance; NA means data are missing for a sampling event. | 28 |
| 1.6.3. Descriptive statistics for the ranches drainage water chemistry. SC is specific conductance; NA means data are missing for a sampling event. | 29 |
| 1.6.4. Descriptive statistics for the Stump Creek water chemistry. SC is specific conductance; NA means data are missing for a sampling event. | 30 |
| 1.6.5. Descriptive statistics for the Winters Creek water chemistry. SC is specific conductance; NA means data are missing for a sampling event. | 31 |
